## 'Do Not Be Swayed by Hurrahs,' Says Dean

"Let us profit by our past mistakes and avoid errors, and not be swayed by the hurrahs," was the advice which Dean E. A. Howe, of the staff of the University of Alberta, gave in his address before the Dairy Convention recently held in Calgary, when he made "Some Comments on Farm Practices."

If farmers followed the advice being broadcast at the present time, said the Dean, they were just as liable to go wrong by going in for extensive livestock as they had in wheat farming; and he sounded a warning at this time that farmers go into livestock slowly and depend on natural increase to enlarge their herds.

There are certain areas where mixed farming is not logical, and it was necessary to study the soil and learn the amount of precipitation before deciding on the kind of agriculture to be followed in a certain district.

## Stony Plain and District

Mr Robt Stokes took up a party of prospective settlers on Monday to the Homestead country around Rossmore, 80 miles west.

The annual meeting of rate-payers of Inga Municipality on Saturday next, Feb. 21st, is being eagerly looked forward to by many. The meeting takes place in the town hall.

The officers and members of Meridian Lodge will hold a social evening and dance in Moose hall tomorrow night.

Bart's orchestra played at Onoway Community dance on Friday evening last. Bart's are playing at the dance here, this evening.

The dance given in their hall last Friday night by local Moose lodge was well attended, and the novelties distributed were greatly appreciated by those present.

There will be a gay party tomorrow (Friday) night at Rosenthal hall, the occasion being another popular dance by the Rhythm-Ace musicians.

The Royal Cafe (L. M. Larson proprietor) is today celebrating the anniversary of its opening in Stony Plain. There will be a special anniversary sale of candies, etc. Pay this place a visit today (Thurs.)

Dance, Muir Lake hall, Fri. Feb. 27. Swedish orchestra.

## "The Outdoor Living Room"

On Wednesday evening Feb. 25th, at 8 o'clock, Professor Hazcourt (of the University of Alberta) will lecture in the town hall on the subject: "The Outdoor Living Room." This subject treats of the care of plants, bulbs and shrubs, and is illustrated by lantern slides. The public is cordially invited to come and show their interest. There will be no charge.

## Protecting Farmers' Chattels

The Alberta Legislature on Thursday last referred the whole question of the protection of farmers against seizure of certain chattels to meet financial liabilities, to the standing committee on agriculture.

The motion had been made by J. M. Dochow, the Liberal member for St. Paul, and called upon the Assembly to resolve that all chattel mortgages which may hereafter be taken from farmers by machinery companies, implement companies and automobile financing companies as additional security for existing debt and covering any chattels exempt from seizure by virtue of the Alberta Exemption act, shall be null and void.

Gen. McLaughlin, member for Rosedale, had suggested an amendment to this, to the effect that an amendment to the Exemption Act should be considered, protecting the person against whom a chattel mortgage is taken against seizure of certain chattels required necessary to life and to the continuance of farming operations.

### Governments And The People

In times like the present governments as well as individuals are hard pressed to make ends meet and to secure the necessary revenues to carry on the public services. In some respects the problems which confront governments at such a time are even more difficult than those which face the individual. This, however, is something few people are prepared to admit. Inasmuch as government business is merely the business of all individual citizens, instead of one or two only, it is well that people generally should understand and so appreciate some of the difficulties which confront them in their collective capacity, federally and provincially, at the present time.

The old fallacy still seems to stick in the minds of many people that governments can always find money; that if more is needed at any time, or in any emergency, it can easily be obtained; that there is, indeed, no bottom to the public purse, so limit to a government's borrowing powers. And this misconception on the part of so many people lies at the root of many of our taxation problems.

When "hard times" come upon us, crops fail, business slackens, unemployment ensues, prices fall below costs of production, products cannot be sold at any price, people turn to governments to help them out,—that is, if they would only realize it, they turn to themselves. But they seem to forget, or conveniently ignore the fact that their own loss of earning, consuming, and tax paying power immediately reacts upon their governments, depriving them of the revenues so essential to meet the increased demands the people would place upon them.

Government revenues drop because, through unemployment or inability to sell products at a profit, people are unable to pay taxes, and because, of necessity, they must consume less and make fewer purchases other sources of government income are dried up or greatly reduced. But it is at just such times when governments are least able to spend money,—because they have not got it,—people demand that they spend more money than before and thus provide work; they demand direct cash grants in relief to tide them over the hard times; in a word, they insist that governments shall help them out, ignoring the fact that collectively they are in the same position as they are individually,—therefore, governments are in like difficulty to themselves.

Governments, of course, can borrow money,—up to a certain limit. But every dollar borrowed mortgages the future. It must be repaid some time, or, in the alternative, interest must be paid for all time to come. Once interest payments are not made the source of future borrowings dries up. And every dollar required to pay interest, is a dollar less available for current government requirements.

Examine the present situation. Revenues of Provincial governments throughout Canada are falling. They have less money to spend, and greater demands made upon them than ever before. From the Atlantic to the Pacific every Provincial Treasurer has the same story to tell, large deficits upon the year's operations. They must secure larger revenues or enormously decrease expenditures. Such revenues can only be obtained by increased taxation at a time when people cannot pay present taxes; decreased expenditures, except in some minor details, are impossible because the people insist on larger public expenditures, to offset the decline in private expenditures, and thus provide employment.

The Dominion Government is in exactly the same position, falling revenues, increased expenditures, large deficits. The Dominion is, therefore, looking for new sources of revenue to make ends meet, and at the same time the Provinces are calling upon the Dominion to relinquish to them certain of its present sources of revenue; asking the Dominion to pay them larger cash subsidies; asking them to take over certain services and responsibilities hitherto borne by the Provinces.

It is becoming increasingly necessary that "all" people should realize that whether a service is provided by the Dominion Government or by their Provincial Government; whether the taxes are levied and collected by the Dominion, or the Province, or the municipality; whether the money is borrowed by one government or another, they, the people, must do the paying. They must pay now or later. The more they borrow now, the more they have mortgaged their future, the more they will have to pay later, the heavier the handicap they have placed on a quick and permanent return to better times.

Bearing this fundamental, inescapable truth in mind, people will be well advised not to rely too greatly upon governments in times of stress, but rather to go the limit in endeavoring to meet their individual problems as individuals. It will be better for them, individually and collectively, in the long run.

#### Fed Away From Air

British Troops Flew Off Shipping Routes By Paratroops

The British army recently carried out a very successful test of feeding an army from the air. A column of 1,000 started out on a 100-mile march and all their rations were carried by

air. Two drops for rations were made on route and each day 50 parachute loads were dropped, each weighing 120 pounds. Fourteen "Wapiti" planes dropped four loads a day on a spot of ground marked out in advance. On the first day 48 of the 50 loads were dropped in the marked circle. The second day all the loads were dropped as directed.

### Heart and Nerves So Bad You Wish To Drop For Sleep

Miss Thomas M. Harvey, Gillingham, Ont., writes:—"I was troubled, for almost a year, with my heart and nerves, especially on retiring at night, when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could enjoy a good night's rest, and rapidly regained my former state of health."

Price 64c a box

Sold at all drug and grocery stores, or mailed direct on receipt of order by The Milburn Co. Ltd., Toronto, Ont.

#### World Organisation Commission

Suggests Farm Products Marketing Body To Assist Agricultural Credit Corporation

Organization of a farm products marketing commission as a corollary of the agricultural credit corporation recently proposed by E. W. Beatty, president of the Canadian Pacific Railway, was advocated by John M. Inrie, of Edmonton, in addressing the Empire Club at Toronto.

The commission would be fact finding and advisory only, under Mr. Inrie's proposal. It would seek to coordinate production and marketing and to stimulate and support existing marketing services rather than to create any new marketing mechanism. It would endeavor to secure for Canada's own farmers the largest possible proportion of their own domestic market, thus displacing substantial imports of secondary farm products from other countries. Outside of Canada it would seek to expand present markets, to find new ones, and to study requirements of both.

The commission would co-operate wholeheartedly with the Dominion Department of Trade and Commerce, the Canadian Trade Commissioner service, related transportation and financial interests, and the various trade channels through which the actual selling would continue to be done as at present.

Mr. Inrie, who was chairman of the Canadian Chamber of Commerce trade mission to the Orient, addressed his audience on "New Markets Across the Pacific."

Persian Balm harvests every woman with subtle charm. Delicately fragrant. Cooling and healing. Disperses all roughness or chafing. Makes skin delightfully soft-textured. Every woman should use this perfect toilet requisite. Daintiness—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

#### Lynchings in U.S.

Figures of Lynchings For Year 1930 Are Not Encouraging

Optimistic observers who thought a few years ago that lynching was about to die out in the United States get a jolt in the 1930 figures on this American form of lawlessness. Twenty-five lynchings are recorded in the closing twelve months by the National Association for the Advancement of colored people in its annual summary of lynching. This compares with twelve in 1928, a jump of 100 per cent. This increase is bad enough, but when it is compared with the figures for twenty-five or thirty years ago, when lynchings ran as high as 255 in one year, it is still possible to credit ourselves with some progress along the road away from lawlessness—Cleveland Plain Dealer.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites by the writhings and frettings of the child. Until expelled and the system cleared of them, the child cannot regain its health. Miller's Worm Powders are prompt and efficient, not only for the eradication of worms, but also as a toner up for children that are run down in consequence.

#### British Settles For B.C.

Report States People With Wealth Are Interested

More wealthy British people came to British Columbia in the last year to settle, through the agency of British Columbia House, London, England, than ever before, F. A. Paulsen, retiring agent-general reports.

For the twelve months ending September 30 last, Mr. Paulsen said, 366 people left Britain for this province with a view to immediate settlement or in order to make a personal inspection with a view to settling, and all these people had capital. Their total capital amounted to \$86,610 pounds apart from unvested incomes, totalling 48,468 pounds.

#### Similar Pay Capable

The net production of all privately employed persons in Canada in 1929 amounted to \$9,273,391,500 or \$500 per capita, according to an estimate of the Finance-Trade Business Year Book, 1931.

When You OVER—INDULGE

EVERY man, woman and child will occasionally over-indulge. But don't suffer for your indiscretions. It's folly to do so when you can so easily sweeten and settle a sour, upset stomach with a little Phillips' Milk of Magnesia.

Hearty eaters have long since learned the quick comfort this perfect anti-acid brings. Smokers know how it neutralizes nicotine; brings back a sweet taste; guards the breath. Women know what it does for nausea—or sick headaches. And when children have over-eaten—are bilious, constipated or otherwise upset—give them a little of the

most pleasant-tasting and milky-white Phillips' Milk of Magnesia.

You'll be through with crude methods once you learn the perfect way. Nothing else has the same quick, gentle effect. Doctors prescribe it for indigestion, nausea, heartburn, gas, sour stomach and headache. It has been standard with them for over 50 years.

Insist on genuine Phillips' Milk of Magnesia; a less perfect product may not act the same. The genuine is always a liquid—never in tablet form—and the name Phillips' is always on bottle and wrapper.

HUNTER-MARTIN & CO., REGINA, SASK.

# Industrial Alcohol May Be Manufactured From Waste Gases In Turner Valley Oil Field

Solution to part of the problem of finding uses for the abundant waste of natural gas in the Turner Valley oil field of Alberta is a possibility as a result of a process for the manufacture of industrial alcohol that has been developed in the laboratories of the National Research Council.

If applied to the so-called stillwater gases—the gases which are collected at the well heads along with the crude gasoline, but later are allowed to escape into the atmosphere—the process, it is estimated by Dr. G. S. Whitby, director of the division of chemistry, could yield industrial alcohol to the extent of 10,000,000 gallons a year.

If applied to the total waste of gases in the field, the figure would be 100,000,000 gallons. Immediate prospects of alcohol production at an economical cost are considered better for the former than the latter, it is said. That quantity of gas already would be under some control, hence more readily available.

Industrial alcohol, according to statistics available, is being increasingly demanded. While the British have been turning to a study of coal in their efforts to make themselves independent of outside power for liquid motor fuel, the French have turned to industrial alcohol. If it can be manufactured at a sufficiently low price experts believe there is a prospect of it finding its way into use for this purpose.

Officers of the research council are now studying the economic possibilities of the process which has been developed. It is stated the operating cost, excluding overhead and any charges made for the new waste gas required, would not exceed 25 cents per gallon. Industrial alcohol used annually in Canada at the present time is valued at more than \$2,000,000.

How tremendous is the present loss of gas in the Alberta fields is indicated by the fact that the amounts of industrial alcohol mentioned would be produced, if the process is found practicable and put into operation, from about 10 per cent. by volume of the total gases going to waste or 30 per cent. by weight.

At the last meeting of the national research council's associate committee on gas research, held in Edmonton in January, it was said that a conservative estimate of the total waste would be 400,000,000 cubic feet per day.

The senior chemist in the national research on the waste gas problem (Dr. A. Chisholm), is said to have devised a process whereby they can be converted readily into another gas, known as ethylene, from which it is an easy matter to manufacture the industrial alcohol, and, as a matter of fact, a wide variety of other chemicals, including glycol (anti-freeze). If only the stillwater gases were used in the process, it is estimated that in their liquid form the amount of them available would total 1,200,000 gallons a month.

## Modern Paper Made

One of the most recent developments in the use of paper is a paper felt saturated with asphalt which is used as a match paper and is laid on the ground between rows of certain growing crops to prevent the excessive evaporation of soil moisture and to keep down weed growth.

"I had a bottle of brandy. Has it been brought in?"  
"No. But the man who found it has."—Walter Raleigh, Berlin.

W. A. G. 1947

## Portugal Exhibiting At World's Grain Show

Officials At Lisbon Make Arrangements Of Entry

Official arrangements have been made from the headquarters of the World's Grain Exhibition and Conference, Regina, of the acceptance by the Portuguese Government of the invitation to participate in the world-wide grain exhibition and conference to be held in that city in 1932.

The announcement of this official acceptance has reached the exhibition authorities through Arthur King, commercial secretary of His Majesty's Embassy and His Majesty's Consul at Lisbon.

A commission has been appointed by the Portuguese Government to make arrangements for Portugal's representation at Regina in 1932, of which Professor Ray Meyer, of the agricultural college of Lisbon, is chairman.

Twelve countries have now accepted the official invitation to take part in the 1932 event, namely: Italy, Peru, Yugoslavia, Guatemala, New Zealand, Czechoslovakia, the Netherlands, Belgium, Poland, Spain, India and Portugal.

The cultivated area of Portugal, according to a recent statement from the ministry of agriculture, is about 14,000,000 acres. In 1928 the wheat crop amounted to over 10,000,000 bushels; oats nearly 11,000,000 bushels; barley nearly 3,000,000 bushels, and corn over 400,000 tons. Broad beans and French beans are also cultivated and while no information is yet available as to the class of exhibit which will be prepared by the Portuguese ministry of agriculture for the Regina grain show, it is expected it will include the staple products of the country.

## Must Not Use Cornstarch

Rules To Be Observed By Those Entering Grain Competition

Visions of injury in her bosom were conjured up, when M. T. Wiener, secretary-treasurer of the Canadian Seed Growers' Association, was addressing members of the Ontario Field Crop and Seed Growers' Association, at Toronto.

Mr. Wiener, referring to the World Grain Exhibition to be held in Regina in 1932, was outlining some of the rules to be observed by those entering wheat. "The use of vanishing cream, furniture polish or varnish in this show would be a detriment rather than a merit," several ladies gasped audibly—until Mr. Wiener explained that the vanishing cream, furniture polish, and varnish were often used by farmers in "dressing" their grain exhibits.

## Sanatorium Feeding Food

Legislation To Prevent Smuggling Of All Eggs And Poultry Through One Agency Is Proposed

Seventy-five per cent. of the voters favored legislation to permit the marketing of all eggs and poultry products through one provincial organization, as the result of a ballot among the members of the Saskatchewan Co-Operative Poultry Producers, Limited, it was announced by Don Graham, secretary of the organization. The percentage of members voting was 41.1.

"It is expected that early action will be taken in connection with the matter," Mr. Graham said. The ballot was taken following the instructions of the board of directors, at the request of boards at annual meetings this fall.

## Must Show How Gardens

Edward Bok, of Ladies Home Journal fame, was continually approached by women who wanted his advice in problems of the heart. One, who said she had lost three husbands and now had an offer of a fourth, sought Mr. Bok's opinion.

"Should I accept him?" she asked.  
"If you have already had three husbands," replied Mr. Bok, "I should say that you are too careless to be concerned with a fourth."

## Big Credit Corporation

Organization With \$2,000,000 Capital Planned In The West

One of the pressing problems confronting government and business leaders seems to be the need of increasing the credit facilities available in the farming in the west. The first official move has been inaugurated—towards the solution of the \$2,000,000 credit corporation, foreseen by Premier R. B. Bennett in his speech at Regina, when application for incorporation was made to the secretary of state.

The application for a charter for the Dominion Agricultural Credit Company, Limited, came from a Montreal legal firm. The shareholders will be banks, loan companies, insurance companies, the two railway companies and certain industrial and mercantile interests, and loans will be made to farmers who have been engaged almost wholly in grain growing to enable them to get into mixed farming. The company will be empowered to lend money on livestock, and to deal in livestock, but will be unable to lend on mortgages.

Asked about the recent activities of the farm loan board, Dr. J. D. MacLennan, chairman, said the board had been loaning money in Manitoba and Alberta to small farmers. He did not anticipate any change in the activities of the board. The board does not operate in Saskatchewan because the provincial government there has a similar organization.

Loans on the security of farm lands are seldom placed during the winter season, because it is difficult to value land when the ground is frozen and covered with snow. The farm loan board so far has had plenty of money available, and when weather conditions make it possible to value land with place loans as usual.

## The Fisheries Of Canada, 1929

Complete Statistics Of Industry Have Been Prepared By Government

Complete statistics of the fishing industry of Canada for the year 1929 have just been issued by the Dominion Bureau of Statistics, in co-operation with the Department of Fisheries. The report gives information regarding the landing and marketing of fish in each fishing district in Canada, with totals for counties and provinces. The number and value of boats and gear is also shown by fishing districts, and details regarding fish catching and curing establishments, by counties.

The total catch of all kinds of fish in 1929 amounted to 1,002,004,000 pounds, and the marketed value was \$63,518,521. The industry had a capital investment of \$42,579,644 and gave employment to 26,400 persons. Canada exported in 1929 fish and fish products to the value of \$27,346,393, while imports of similar products were valued at \$4,233,968.

Copies of the report may be obtained upon application to the Dominion Bureau of Statistics, Ottawa.

## Not So Well Known

Village Policemen: "This won't do. We've had too many 'flouts' about here. Give me your real name and be quick about it, too."

Speeder: "Well, if I must, it's W. Shakespeare."

"That's better. You can't bluff a man like me with that 'flout' stuff."

# North Pole Flight Planned For Next Summer By Giant German Dirigible, Graf Zeppelin

## Reindeer Industry For Canada

May Establish Large Herd In The Lake Wapigan District

One thousand reindeer in Alaska will cross the grassy north of Port Arthur to the near future if plans to bring a huge herd down from the north develop. H. H. Diamond and Charles Reindeer, owners of the Diamond Reindeer Ranch, south of North Lake, 20 miles from Grand Marais, Minn., arrived at Port Arthur with plans to secure grazing privileges in the district north and west of Lake Wapigan.

Diamond has several years experience with the reindeer industry and is a stockholder in the Alaskan Reindeer Company of St. Michael, Alaska. This company has a herd of more than 15,000. Diamond declared many advantages exist for the industry in the markets of Canadian and American cities. Establishment of a large herd nearer the markets is planned.

Reindeer and Diamond, after three years experimenting, state they have established beyond all doubt the feasibility of breeding reindeer on a large scale in this climate. Reindeer live on moss, they said, and extensive trips into Canadian territory in this area have shown that moss can be found in vast quantities.

## Pasteurization Of Milk

Importance Has Been Proved By Children's Health Organizations

Pasteurization today is a great step forward in hygiene. It has already saved many lives in towns where it has been introduced. It has prevented illness and the mental suffering which accompanies impaired physical health. It is generally admitted that milk and milk products are the most important articles in the family larder. The importance of pasteurization is proved by children's health organizations. The national council of the milk industry, an organization composed of representatives of all branches of commerce and industry, has adopted a resolution recommending that all milk offered for sale in towns and villages should be pasteurized.

## Chemical Fertilizer

Plant At York, B.C., To Manufacture Nitrate, Phosphate, and Potash

Nitrate, which in the past has been brought all the way to Canada from Chile, will soon be produced in large quantities in British Columbia as one of the chemical fertilizers to be turned out by the new plant of the Consolidated Mining and Smelting Corporation at Trail, which plans to manufacture nitrate, phosphate, and potash—the chief ingredients in building up the fertility of the soil. The first shipments to the Prairies will be made in time for the spring planting.

Harvest produced 200,000 tons of sugar last year.

## WEATHER KINGS AND QUEENS

Servant Frodo, whom King and Queen Steve please, is shown above with Mr. Frodo. Mr. Frodo declares "servant" is not the general feeling of the west and that Canada could claim the world's grain harvest beyond competition by raising the grade and quality of wheat.

Plans for a flight to the North Pole by the giant German dirigible Graf Zeppelin next summer have been definitely completed, Ludwig Blumhagen, director of the Leipzig Geophysical Institute, announced recently.

The question of insurance is the only snag in the way of a 1931 trip, he said. Blumhagen plans in 1929 to be accompanied by insurance companies refused to cover the risk of disaster in the frozen north.

The principal work of the expedition, Herr Weichmann said, would be the exploration of newly-discovered islands between Franz Josef Land and Bismarck, Nicholas Land. A Soviet expedition has already reached a wireless station on one of the islands, which will be used as a base.

Schmidt says the experts aboard the dirigible will be able to determine exactly the contours of Bismarck, Nicholas Land and the islands by photographic survey.

The Graf Zeppelin will head into the Arctic wastes from Leningrad if possible. German and Swedish scientists will be landed to explore the new islands on foot.

The dirigible is now in the winter quarters at Friedrichshafen, after a profitable year during which it made 184 flights, carried 4,000 passengers and nearly 1,000,000 pieces of mail.

It will be extensively overhauled before starting the polar journey.

## Canada Leads In Surveying

Methods Are More Advanced Than Those Of Other Nations

Canada is showing the way in other nations to advance methods of mapping and surveying, according speakers told the annual convention of the Association of Dominion Land Surveyors at Ottawa. Especially was this true of aerial surveying, the Federal Government alone mapping over 40,000 square miles last year, the association was told.

In opening the convention, W. H. Tohy, the president, stressed the many developments that had been taking place in Canada in recent years. Led by the two main railway companies, travelling facilities were being constructed into many hitherto inaccessible parts of the country. Water power was being developed at such a rate that Canada now ranked third among the nations of the world in this respect. In addition, Canada was forging ahead in the production of many minerals, new discoveries were being made and new fields opened.

## Telling Time By Bird's Song

Can Be Done By One Who Understands, Says Naturalist

Clocks are not necessary to give the time in the morning if one understands the songs of the birds, according to a German naturalist, who has just completed a schedule of offerings by feathered songsters. He says the chickadee sings at about 1:30 on summer mornings, and the blackcap calls an hour later. Between 2:30 and three o'clock the quail give their call, while the hedge sparrows are heard about 30 minutes later. The blackbirds are next, followed by larks, the black-headed tit-mouse, and finally the sparrows sing between five and 5:30.

"And if anyone tells you on the left cheek, or a good Christian you do not let back. What do you do?"  
"Tell my big brother,"—Felix, Vienna.

### WORLD HAPPENINGS BRIEFLY TOLD

**Carylon Belaire, Conservative,** headed Prime Minister Mackenzie Bowden as an affidavit, asserting there were 852,208 prisoners working in Soviet lumber camps last May.

Lumber and pulpwood from four localities of Russia have been barred from the United States by the treasury unless the shippers can prove they are not produced by convict labor.

Vincent Willington, who in April will become Viceroy of India in succession to Lord Irwin, has been designated an earl by the king. Lord Willington resigned as governor-general of Canada to take up his new post.

Bermuda's legislative council voted 5 to 2 against a measure which would permit physicians to use automobiles on island. Bermuda has resisted for years all attempts to introduce the motor car.

The entire squadron of eleven Italian seaplanes, which reached Brazil after a trans-Atlantic flight from Rome and Portuguese Guinea, has been sold to the Brazilian government. The price was \$70,000 less about \$12,000 for each plane.

Soviet Russia will participate in the work of the commission studying plans for a European Federation, the government notified the League of Nations last Tuesday. The right to define its attitude towards the commission at a later date.

**For Frost Bites and Chills.** — Chills come from undue exposure to such and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

### Canada's Low-Priced Power

**No Limit To Possibilities For Industrial Expansion**

The World Power Conference in which forty-eight different countries are represented meets at stated times in the various capitals of the world to discuss power problems. These periodical meetings at which Canada takes a leading part afford an unparalleled opportunity to demonstrate to the world at large the position Canada occupies as a land of low-priced power with unlimited possibilities for industrial expansion.

The Khyber Pass, in Afghanistan, is the principal pass into that country from India. It is about 30 miles long.

### SUNDAY SCHOOL LESSON

FEBRUARY 22

**THEY TEACHING THE GOOD THINGS**

**Golden Text:** "He went about through cities and villages, preaching and bringing the good tidings of the Kingdom of God."—Luke 8:1.

**Lesson:** Luke 8.

**Devotional Reading:** Isaiah 51:1-3, 10, 11.

#### Explanations and Comments

The Great Ministry, verses 1-3.—It came to pass soon afterwards—Luke gives no definite information as to the time—that Jesus went through cities and villages, a great Ministry accompanied by His twelve disciples, and everywhere He preached and brought good tidings of the Kingdom of God.

The Ministry Of Women, verses 1-3.—Certain women whom Jesus had healed were also in the company, and among them was Mary Magdalene, probably so called because she was from Magdala, a village on the western shore of the Sea of Galilee, and to distinguish her from other Marys. We are also told that she had been freed from seven demons, and by this is meant, not that she had been depraved, but that she had been violently insane and had been restored to her right mind by the power of Jesus. Another woman was Joanna, the wife of Chuzas, who was the steward, or manager, of the house of Herod Antipas. Mary, Joanna, Susanna, and many other women ministered unto them of their substance, gave their money for the food and other necessities of Jesus and His disciples. Throughout His ministry Jesus had not where to lay His head, but was dependent upon the hospitality and kindly ministry of friends and strangers.

The Parable Of the Sower, verses 4-8.—Within the view of Jesus as He spoke this Parable of the Sower was doubtless a sower at work in a cornfield which descended to the water's edge. Deane Stanley describes such a field: "There was the trodden pathway running through the midst of it, with no fence or hedge to prevent the seed from falling here or there on either side of it or upon it; itself hard with the constant tramp of horse, mule, and human feet. There was the good rich soil; there was the rocky ground of the hillside protruding here and there through the cornfields; there were the large bushes of thorn—the 'babb,' that kind of which tradition says the crown of thorns was woven—springing up in the very midst of the waving wheat."

A sower was sowing seed, so runs this parable. He lived in a hamlet or village, as all the farmers do now in Palestine, and went to his unfenced field afar off to sow his seed. Some of it fell on the beaten path which ran through the field and lay there on the hard surface till the birds devoured it. Some of the seed fell on the hillside where the underlying rock came very near the surface; the soil there was shallow and the weight of the rock made the seed spring up quickly and look very promising, but the roots of the plant could not strike down deep and avoid the heat of the sun, and therefore the plants quickly withered away. Plants from the seed that fell where seeds of thorns were plentiful were overshadowed and starved to death by the more rapidly growing thorns. Some seed there was that fell on good ground, where the soil was rich and deep and free from thorns, and it yielded thirty and sixty and even a hundredfold. "He that hath ears to hear, let him hear"—thus Jesus ended His parable.

**No Rest With Aches.** Aches usually attack at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Aches Remedy has proved its merits through years of service. A trial will surely convince you.

#### Holograph Will

**New Legal In Substitution To Sign Will Without Presence Of Witnesses**

It will be legal in future for any person in Saskatchewan to make a holograph will, that is, a will wholly in his or her own handwriting and without the presence of witnesses being required.

This important change in the law of wills was made in the legislature only after a strenuous fight when the hon. Wm. Ait, was in committee stage in the end a standing vote was called, the minority dividing 21 to 20 against a motion by T. C. Davis, K.C., Liberal member for Prince Albert and former attorney-general, that this particular clause should be struck out.

"Does your wife stay you?"  
 "Yes, my dear. Ten years ago when we were married, I told her to run the house just as she pleased. And she does!"

#### Automating! Can Eat Anything.

Mr. Frank Chatham, of Blackburn, writes:—"I have suffered long from acid stomach and constipation, but since being advised to try your wonderful Carter's Little Liver Pills I began to feel the benefit after almost the first dose. I can now honestly say that I can eat anything and enjoy my food knowing that I will not suffer any disagreeable after effects."

Take Carter's Little Liver Pills for sick headache, biliousness and constipation. They act as a tonic. All druggists sell the red flag.

#### Three Questions For Germany To Answer

**And Which Could Very Well Be Asked All Nations**

Vincent Cook of Chelwood, British delegate to the League of Nations preparatory disarmament commission in Geneva recently, put three questions on peace and war to the German people in the newspaper "Neues Courrier." They were:

"Are you willing to let your young men, now attending school or playing at home, get killed or maimed in a coming war because several nations fight out their rivalry with weapons?"

"Secondly, are you satisfied that the nations spend over \$10,000,000 daily for armaments while at the same time millions of families sink into deep poverty and unemployment, and simultaneously institutions of social, religious and educational character suffer enormously?"

"Thirdly, are you willing to see to it that international disputes are settled by your government in a peaceful way, that your government adhere to a policy of co-operation in the interest of all nations, and that money will not be needlessly wasted?"

**Keep Douglas' Egyptian Liniment** always in the stable, ready for immediate use. Removes proud flesh and inflammation. Throats or Hoof Rot, and infection of cow's teat.

Practically one of every 10 pounds of coffee exported from Colombia is being sent to the United States.

#### Aerial Progress in North

**Extension Of Transport Facilities By Means Of Airways**

One of the outstanding developments in the North is the program being made in aerial transportation. With the inauguration of the air mail service; the extension of transport facilities by the fleets of 'planes of the three national companies operating in the Northwest Territories in moving prospectors and supplies to different fields; and the increasingly important part played by the Royal Canadian Air Force in aerial surveying and transporting government officials and supplies, the aeroplane in the North has become a common means of travel. In one day recently as many as twelve 'planes were seen at one of the posts along the Mackenzie River system.

**RASHES**  
 VANISH QUICK

"My face was covered with itching rashes. One application of 'Rashes Vanish' removed the itching, it cleared the skin, and I felt better. Get 'Rashes Vanish' today. All druggists."

#### Pressmen Revalued

Many newsboys in London, England, are making from \$7,500 a year and more, according to Alexander MacLaren, secretary of the National Federation of Retail Newsagents and Stationers, who testified recently before the House of Commons Select Committee. He told of one street seller of newspapers and periodicals who is making \$15,000 a year, of another newsboy whose profits total \$10,000, and several others with yearly incomes of \$12,000.

## CONSERVATIVES WIN IN ONTARIO BY-ELECTIONS

Toronto, Ont.—After the warmest by-election campaign in connection with the Ontario legislature for many years, electors of Grenville and Hamilton West returned Conservative government candidates by greatly reduced majorities.

James E. Sanderson of Oxford Mills was elected in Grenville, and Alderman Argue Martin in Hamilton West. Both constituencies have been represented in the legislature by Conservatives for about 25 years. The vacancy in Grenville was caused by the resignation of Hon. G. Howard Ferguson, new Canadian high commissioner. West Hamilton was opened as the result of the death of Hon. Fred T. Smye.

Mr. Sanderson piled up a majority of approximately 1,476 votes over his Liberal opponent, Percy Bernard. The vote was Sanderson, 4,761; Bernard, 3,285. In 1928, Mr. Ferguson carried the Grenville seat by a majority of slightly more than 2,000 votes.

Alderman Martin was victor by 284 votes over his Liberal opponent, Capt. Elmore Philpott. At the last general election in 1928, Hon. P. T. Smye, Conservative, was elected by a majority of 4,712 votes.

Hamilton, Ont.—Liberal forces in the West Hamilton by-election for the Ontario legislature were defeated after one of the bitterest fights in the history of the riding. Alderman Argue Martin, Conservative government candidate, was elected by a majority of 344 votes over his Liberal opponent, Captain Elmore Philpott.

The campaign in Hamilton attracted the attention of the entire province. Captain Philpott chose the administration of the attorney-general, Hon. W. H. Price, as the issue at stake and fought a slashing battle for election, backed by M. F. Hepburn, M.P., recently elected leader of the provincial Liberal party.

### Advocates Free Port

Free Entry Of British Goods Through Hudson Bay Suggested As Cure For Trouble Of The West

Winnipeg, Man.—Best of all the suggested measures to lead Western Canada out of its economic difficulties was free entry of British goods through Churchill, Manitoba's Hudson Bay port, said A. J. M. Poole, government member for Beautiful Plains, in the legislature recently. Other relief measures would not effect a permanent cure for the west's ills, he declared.

Mr. Poole forecast strenuous opposition in Eastern Canada to plans for making Churchill a free port of entry. He thought, however, that since the east was "so much in love with tariffs," they could erect a tariff wall east of the Head of the Lakes to keep out goods that would enter the west by way of Hudson Bay.

A farmer himself, the member for Beautiful Plains discussed the grain situation from the grower angle. With reference to diversified farming, which he said bankers, boards of trade and urban people suggested as a remedy, "without any appreciation of the difficulties involved," Mr. Poole thought it was worth trying. "But it is not the real solution," he added.

He urged that the Bennett government undertake construction of the Mackinac short-cut to the Hudson Bay Railway.

### Army Johnson Returns

London, England.—Buffeted by high winds after crossing the English channel, Miss Amy Johnson set her biplane down at North London airport. The British aviatrix was returning from Hannover, Germany, after abandoning at Warsaw the proposed London-Peking flight she began recently. She may attempt the flight again in the spring.

### Big Plane Atlantic Flight

Tokyo, Japan.—The vernacular newspaper "Hochi" announced that Kaji Yoshimaru, Japanese aviator, will make a solitary trans-Pacific flight from Tokyo to San Francisco via the northern route in April.

W. H. U. MPT

## Deportation From Canada Discussed

Question Of Return Of English Born Citizens Before British House

London, England.—Question of the deportation of English-born citizens from Canada came up in the House of Commons, and Mr. J. M. Thomas, secretary of state for the Dominions, made it known that the government is considering the matter of making representations to the Dominion.

It was Major Leslie Morehead, Liberal member for Devonport, who raised the question in the Commons, citing the recent deportation of 107 British subjects on board the steamship "Ascania." Mr. Morehead asked that the secretary for the Dominion should represent to the Canadian government that "the deportation of persons who had not been guilty of crimes or any irregularity is hardly an indication of a spirit of imperial unity."

Mr. Thomas replied that the inquiry in the "Ascania" case had shown that 96 of the deportees were public charges in Canada, nine had been convicted of various offenses, one was suffering from tuberculosis and the remaining cases had not yet been settled. He said, were Canadian-born children who, being of tender years, had accompanied their parents back to England.

### Nine Bombs In China

Report Says Considerable Loss Of Life Was Caused

Peking, China.—Chinese reports from Manchuria here, said that 3,000 miners were entombed in the Fushun mines by an underground explosion. A considerable loss of life was feared. Rescue work was started immediately, but only a few persons could be taken from the shaft. Relatives of the entombed men gathered at the pithead in their grief making a pitiful scene.

### Billion Celebrates Birthday

Fort Myers, Fla.—Thomas A. Edison received the "happy birthday" greetings of the United States on Feb. 11. Celebrating his 84th anniversary at his winter home, he took time off from his rubber experiments to add in a general observance of the event. Florida and the city of Fort Myers paid the money-hungry genius homage by dedicating a new \$500,000 bridge in his honor.

### Boy Beasts Arrested

Fort Frances, Ont.—For 45 minutes 16-year-old Robert Kilowski possessed \$1,000, but now he is lodged in the town jail. Masked and alone the youngster slipped into the Dominion Bank here while most of the clerks were at noon-day lunch. Under the bandit's leveled revolver, the clerk handed out \$1,000 and the boy escaped, only to be arrested promptly on the outskirts of the town.

## EUROPE'S WEALTHIEST MAN

Sir David Robert, Europe's wealthiest man and much discussed mystery figure, who is seriously ill at Monte Carlo. He is 80 years of age.

## Science Of Government

Believes Party System Is Out Of Tune With Present Times

Winnipeg, Man.—Parliamentary practice is falling behind an advancing world, believes J. W. Pratt, independent for Birtle in the Manitoba legislature. In the House, recently, he claimed no business or public utility would attempt to conduct its affairs as legislatures do. He labelled the party system undesirable and unnecessary, tending to decisions made otherwise than on their merits.

Among the improvements suggested by the Birtle member were a fixed term of office provided by statute; an official Hansard for the Manitoba legislature; extension of proportional representation to certain rural districts and a time limit on speeches. Experts, he thought, might explore the science of government and recommend improvements in the present "antiquated system of doing business."

## Millions For Debt

Burden Carried By British Taxpayer Is Increasing

London, England.—The debt, it is officially estimated, will cost the British taxpayer between \$200,000,000 and \$257,000,000 "or even more" during the financial year opening April 1, next.

The figures are contained in a memorandum submitted by the British treasury to the royal commission on unemployment insurance. The memorandum draws attention pointedly to the gravity of the situation.

Contributions by the state doled out will, by 1932, have been the cause of borrowing from the treasury to the tune of \$550,000,000.

## Election Act Comes Before Manitoba House

Revised Bill Brings Sharp Changes In Present Methods

Winnipeg, Man.—Terms of the new Manitoba Election Act, under which the government plans to hold the next election, were made known when the bill came before the legislature for second reading. New provisions call for permanent returning officers, different registration system, stricter observance of candidate qualifications, and invasive provision of new voters' lists.

Based largely on Dominion and Alberta election acts, the new act is aimed at elimination of difficulties facing electors in making their names, explained Hon. W. J. Major, attorney-general. If names were not on the list at the time of registration or revision, he said, provision was made for putting them on the list at election day; no votes should be lost.

Nominating day is to be 25 to 30 days from the date of issuance of writs, it was explained, and polling day the tenth day after nominations. Personal registration will be eliminated, and revision will be available by the returning officer, to be completed within two days. Not more than three deferred elections are permitted under the bill.

## Soviet Demand For Work

Wishes Russia To Be A Large Measure Responsible For Depression

Montreal.—Recalling the apprehension of St. Hon. Winston Churchill over the Russian developments in 1910, Mr. James Dunn, Canadian-born member of London, England, declared here that Soviet influence was in a large measure responsible for the recent world-wide depression. Mr. James arrived here recently from New York on route to his native town, Bathurst, N.B.

Two developments would serve in a great measure to restore stability in Europe, Mr. James said, these being the collapse of the Soviet government and a moratorium on war debts. Questioned as to whether he believed the world depression had reached its peak, he James replied, "What a lot of money we'd make if we knew!" Nevertheless, he said, many of the best informed men he had met recently had shown themselves to be "conservatively hopeful of a bettering of general business conditions before the year is over."

### Selling Out Of March

Ottawa, Ont.—Tentative arrangements call for the selling of the Earl of Bessborough, Canada's New Governor-General, from Liverpool on March 27, on board the "Duchess of Bedford." It is understood that the official ceremony of reception will take place in the legislature buildings at Halifax on the landing of the successor to Earl Wintington on April 4 or 5.

## PARTY LEADERS WILL CONFER ON UNEMPLOYMENT

Edmonton, Alberta.—Party leaders in Alberta's legislature will confer shortly in the hope of reaching agreement upon the stand to be taken by the province in regard to unemployment and the allied matter of unemployment insurance, it was indicated recently.

The matter was raised in the legislature by presentation of a resolution, emanating from the labor ranks, endorsing the principle of unemployment insurance and calling for immediate action towards institution of some such scheme.

In the debate, which preceded tabling of the resolution, the Conservative leader, D. H. Dugan, expressed the opinion that unemployment insurance was primarily a federal responsibility.

Premier John E. Brownlee, taking part in debate for the first time since the session opened, indicated that his government shortly will introduce a measure which will spread the burden imposed by present unemployment conditions over a number of years. He suggested a conference of parties with regard to the situation.

Answering questions from W. K. Howden, Liberal Edmonton, Premier Brownlee said he was hopeful that an unemployment conference will be called by the federal government, to be attended by representatives of the provincial governments, shortly.

## Rothwell Is Appointed Livestock Commissioner

Takes Over Position Formerly Held By H. S. Arkell

Ottawa, Ont.—George H. Rothwell has been appointed acting Dominion livestock commissioner, from which position H. S. Arkell recently resigned to join the Canadian Co-Operative Livestock Association. Mr. Rothwell has been for some years in charge of animal husbandry at the Central Experimental Farm here.

It is understood that Hon. Robert Weir, minister of agriculture, has under consideration a re-organization of the various branches of his department with somewhat changed alignments of duties and the appointment has been made temporary so doubt because a decision is pending as to whether such a reorganization be gone ahead with.

## Wheat Exports About Doubled

The Cash Returns, However, Were \$1,200,000 Less

Ottawa, Ont.—Although Canada exported nearly twice as much wheat in January, 1931, than in the same month last year, the cash return was \$1,200,000 less, it was shown in a report issued recently by the Dominion Bureau of Statistics. Total exports in January last were 9,609,852 bushels, with a cash return of \$5,430,682. In the same month in 1930, the exports were 4,894,054 and the return \$4,746,682.

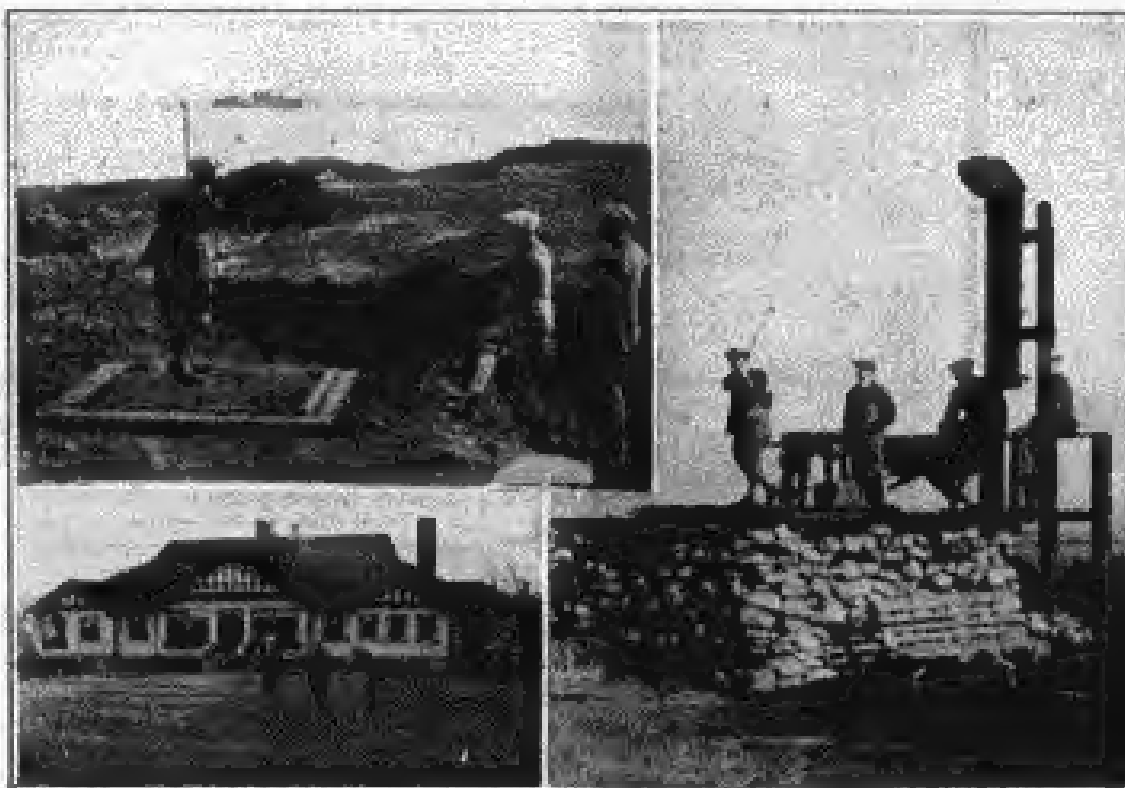

Exports of wheat flour during January were lower than in the corresponding month last year and the cash return likewise was smaller. A total of 302,366 barrels of flour was shipped out of the country during the month, selling for \$1,568,448. In the same month last year, the exports were 302,526 barrels with a cash return of \$2,000,168.

## Convicts Recaptured

Burton's Grim Record Of No Escape Still Upheld

Plymouth, England.—Dartmoor prison's grim record of not a single escape in its history still stands. John Gurnea and John Mallon, two desperate men, who got away recently have been recaptured and sent back to their cells.

They had a long start, but little chance of winning their bid for freedom. The region in which the Dartmoor prison stands is one of the most forbidding in England, surrounded by impenetrable heath. There is no potable water, and roads leading to the prison are always carefully guarded.

Three views of the rocky Oak Bay Golf Course, which play for the R. W. Bentley Challenge Trophy in the third annual Empire Mid-winter Golf tourney will take place February 26 to 28th. The top picture shows a golfer driving from the greens, the middle from the tees of Jack de Pomm and from which a wave can be seen always moving the carryover player's ball away. Lower left, is the Oak Bay Clubhouse, competition headquarters and extreme right of course's setting—the 18th hole, equipped with a paragon in stable position in one over a ridge to the last green.

### Stony Plain and District

A Silver Tea will be held  
at the United church this eve-  
ning.

In connection with the lo-  
cal celebration of School  
Week, Principal Stinson ar-  
ranged to have a special arti-  
cle outlining the history of  
the local school printed. This  
article has unavoidably been  
held over for the issue of next  
week.

There a misreading of the  
letter received from the Wal-  
tham team's manager, it was  
expected that team would be  
at the local rink on Friday  
night. The right date is Fri-  
day, the 20th, and Waltham  
team will be here on Friday  
evening.

The staff of local hair dress-  
ers is being depleted. Mr Alec  
Bauer is still suffering from  
the after effects of an opera-  
tion; and the efficient and en-  
terprising young Philip Trapp  
is spending a vacation at Rose-  
vear.

It looks as if the Onoway  
team don't intend to finish  
their schedule games with our  
Juniors. Their handicaps seems  
to be that they can get play-  
ers from nearby towns for  
their home games, but these  
players are not so easily avail-  
able when Onoway wants to  
play away from home games.

Watch for the date—April  
10, when the Waltham League  
play comes.

### Card of Thanks.

Mr. L. M. Larson, Proprietor of  
the Royal Cafe, wishes to thank  
the public for the generous sup-  
port given him since he opened  
up business in Stony Plain.

### Heard on Main Street.

### Spruce Grove News

The Ladies' Bridge Club  
held their regular weekly play  
at the home of Mrs Wm Mc-  
Leod last Thursday afternoon,  
Feb. 12.

Spruce Grove Community  
League are holding a whist  
drive and dance in Winter-  
burn hall.

Preparations are being made  
to get the tennis courts in  
shape for the members who  
practice for the annual open-  
ing tournament.

Mr W Pinner was a Sun-  
day visitor with Mr M Mac-  
Kean Jr.

Mr M Tashuk's new resi-  
dence is nearing completion,  
and no doubt will be one of  
the finest houses in the settle-  
ment.

Friday evening, Feb. 13th,  
being members' night at the  
Winterburn Community hall,  
members from the Grove were  
present for the weekly play.

Spruce Grove Junior hock-  
eysists scored an easy victory  
over Calahoo in their game  
Feb. 8.

The Grove was well repre-  
sented at the Winterburn W.  
T. whist drive, held recently.

Mr and Mrs C Bealish  
entertained a number of their  
friends to a bridge party and  
social evening on Wed. Feb.  
11th.

Mr Geo Spike of Stony  
Plain was a business visitor  
at the Grove on Tuesday.

Mr H L Morrow, Drayton  
Valley, was in the Grove on  
Monday evening. "Harry" says  
business is first rate in his  
locality.

There have been a number  
of cases of sickness reported  
recently in the Grove and dis-  
trict.

Mr D Bros, who is running  
for Councillor in division six,  
had his posters printed and  
all ready for his campaign,  
when nominations for coun-  
cillors were called for, at the  
annual meeting yesterday in  
Municipal Hall of the inter-  
municipals.

## Here and There

(791)

The New South Wales road for  
October last was 12,151,700 lbs.  
having a landed value of \$298,111,  
as compared with a catch of 10,484,  
700 lbs. with a value of \$129,552,  
for the corresponding month of the  
previous year.

Total amount of capital invested  
in Canada from other countries, as  
of the end of 1929 was \$4,275,511,  
an increase on \$229,000 on it  
compared with the total at the end  
of 1928. Of this outside investment,  
\$1 per cent. is said to be from the  
United States; 50 per cent. British;  
and 4 per cent. from other coun-  
tries.

The yield of potatoes in Canada  
in 1929 totalled 21,933,212 bushels,  
from 214,510 acres, an average yield  
of about 142 bushels per acre. In  
1928 the yield was 20,550,000 bush-  
els from 212,227 acres, or an aver-  
age yield of 127 bushels per acre.  
Potatoes are grown successfully in  
commercial quantities in every  
province of the Dominion.

The Canadian Pacific Railway  
has announced starting of orders  
with the Algonquin Street Company  
of St. Louis for 30,000 tons of  
100 lb. steel rail for spring deliv-  
ery, representing a value of approx-  
imately \$1,500,000. This unusually  
heavy rail will be laid on the new  
line of the company's main line to the  
Mountain Division of British Col-  
umbia.

Fredericton, N.S., Canada's newest  
national port is rapidly approach-  
ing completion. The \$5,000,000  
terminal which the Canadian Gov-  
ernment is building there on a  
turning point for the Upper Great  
Lakes grain route when they come  
down through the Welland Canal in  
the spring of this year will be  
ready for traffic in advance.

Quitting history was made at  
Quebec recently when the seven  
Lavoie brothers piloted their craft  
over the ice-dotted waters of the  
St. Lawrence between Quebec and  
Lewiston in the remarkable time of 5  
minutes, 43 seconds and took first  
place in the canoe race which was  
one of the features of the Quebec  
Winter sports season with head-  
quarters at the Chateau Frontenac.

"Melody Mike" Canadian Pacific  
Railway radio feature given every  
Monday night, is not only attract-  
ing wide popularity in Canada; the  
United States also like it and the  
railway's radio department recently  
had a letter from a school teacher  
in Angola, New York state asking  
for 50 copies of Melody Mike's Pa-  
vane Irish songs, for distribution  
among her pupils.

In 1929 the Dominion's gold pro-  
duction was valued at \$12,000,000,  
an increase of \$2,000,000 over 1928.  
The capital investment in the min-  
ing industry in Canada at the end  
of 1929, the last year for which  
complete industrial statistics are  
yet available, amounted to \$100,000,  
000. In that year the industry gave  
employment to 25,000 men and paid  
out in salaries and wages \$125,000,  
000.

The establishment of a \$75,000  
marine log for handling grain at  
the Ocean Terminal is one part  
of the programme for the develop-  
ment of the Port of Halifax recom-  
mended to the Federal Government  
recently by the Halifax Board of  
Harbour Commissioners. This ad-  
dition, in the opinion of the chair-  
man of the Commission, would at-  
tract more shippers and vessels to  
the port, and would save in one  
year an amount equal to the cost  
of the equipment.

HER FAT IS MELTING  
FAST AWAY

All over the world Kruschen Salts is appealing to girls and women who strive for an attractive, free-from-fat figure that cannot fail to win admiration.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "It's the daily dose that takes off the fat." Don't miss a morning.

Kruschen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood—containing Nature's six life-giving salts—is carried to every organ, gland, nerve and fibre of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

## FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many small "GIANT" packages which make it easy for you to meet our claim for yourself. Ask your druggist for the new "GIANT" 75c package.

This consists of one regular 16 oz. bottle together with a separate trial bottle, sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be better?

By R. Kruschen, Inc., 100 Broadway, New York, N.Y. 10005. Importers: McEwen's, Ltd., Toronto.

## CHAPTER X—Continued.

For the first time there was a tremor in her voice, and the man answered: "You must be down at least. I think it would be wiser for me to go home. But I shall leave a window open. You need only call and I should hear."

"And you will let me know if—if you get word of any sort?"

"Of course. It's not yet midnight. Mrs. Hastings. Will you promise to call if you get nervous, or if the loneliness and anxiety is too much for you?"

He was at the door now, his hand on the knob, looking down at her with no trace of cynicism in his lean face. It was as if he had thrown aside a mask, as indeed he had, although he was himself unconscious of it.

"Oh!" cried Gay, stretching out her

hands impulsively. "Thank you. You are so kind. So—kind!"

"Kind?" He smiled as he took her hands—a weary smile that struck her as very real. "I think," he said, "that, with one exception you are the only woman who ever thought so. The exception was—my mother."

He was gone then, into the night.

And three hours later, when the rain had ceased and the first birdsongs were heralding the dawn, Gay stood in the same spot, facing a Nick whose haggard eyes seemed set in wells of unbelievable fatigue. She did not speak because she could not—nor could he; but he stretched out a mud-stained hand and touched her shoulder, drawing her nearer, until her cheek felt the rough wetness of his coat. When the words came they were almost incoherent in their breathlessness.

"Gay—if I'd known you were here—waiting—watching—thinking—the things you must have thought—If I would have killed me. I—"

He shook, as if with a chill, and seeing his terrible fatigue she pushed him gently into a chair, but he kept her hand, resting his eyes against it as if they hurt.

"Nick," she began huskily. "Thank you. I won't ask you to tell me—anything—now. You must get dry and warm, and—get to bed. I need rest, too. I've been up all night; but—let me know that you're safe—"

Suddenly, as if her words brought him new life, he was up, holding her close, as if he would never let her go. "Oh, Gay," he said brokenly, "trust me without the telling! I am as dead. Trust me—Trust me!"

Then his arms relaxed, and he fell in a heap at her feet.

## CHAPTER XI

When the Halliday car drew up to the door in that grey dawn, the woman who alighted bore little resemblance to the radiant creature on whom James Halliday had looked from the depths of a country hack twelve hours before. The cheery little hat had lost its jaunty angle; the lively scarf was merely a wet string; and over the smart blue coat was a man's sweater; a grey and shapeless garment that hid the Nike lines of the form beneath it.

James Halliday, quick to perceive details at any time, saw at a glance that the man whose steady hand saved his wife from falling as she slipped on the wet pavement, was without an overcoat, and understood that he had sacrificed his sweater that Angela might not suffer. There was always some man at hand to save Angela from discomfort, thought her husband wearily. Then, as Nick lifted his face to the light that had burned on the porch through the hours of darkness, Halliday uttered a smothered exclamation and went quickly down the steps to his wife's side.

"Leave the car keys, Hastings," he said quietly. "You're evidently all in. I'd offer you a hot drink, but I imagine your wife has one ready for you. She's been up all night."

"My wife?" The exclamation that broke from Nick's white lips was as poignant as a cry of pain.

Halliday nodded. "Better get home at once. It's not pleasant business waiting like this, you know; and when I left her I thought her nerves were far from steady. That was at midnight. Good-night, Hastings—or rather, good-morning. Thank you for taking care of Mrs. Halliday."

Nick moved a step away, then turned, as if a sudden thought.

"But I must explain—"

"Mrs. Halliday will do that," answered her husband quietly. "You'd better save your explanations for that plucky little woman across the way. And get to bed. At once. You need it."

Angela had not spoken. She did not speak even as Nick left them. Shivering, she passed her husband and went into the house. A fire was burning on the hearth, and dropping the wet sweater she took down, stretching her hands to the blaze; while without a word Halliday went to the kitchen, returning with a steaming glass of brandy.

"Drink that."

Angela obeyed, making a very face.

"Haven't you something stronger? I'm frozen."

"That will do for now. I've a hot bath ready for you. Better get in as quickly as possible, and then into bed. I've put that in your bag."

## ZAM-BUK

Each Pain, Swelling & Stinging Of  
HEMORRHOIDS (Piles)

If you don't mind, I'll turn to now myself. It's been a hard day.

He moved toward the door, but her voice, a frightened voice, called him back.

"Aren't you going to ask me—anything?"

"No. I have lived with you twelve years, Angela, and questions are now unnecessary."

"But this is different."

She had risen, shakily, and was facing him, her hands twisting the once beautiful scarf into a wet ball.

"I—we—we ran over a—child?"

"You—what?" He was all attention now. "You—killed it?"

"No—but it may die—it would have died if Nick Hastings hadn't acted quickly. She—it was a little girl—she was frightfully hurt. He made me hold her, and she was bloody—bloody! It was more than thirty miles to a hospital. We—screamed—all the way, with that awful child across my knees. It was too horrible. I'm almost dead, and you stand there—doing nothing."

"Who was driving?"

The question cut Angela Halliday like a knife.

"You—you have no right to ask! Well—I was! There! are you satisfied? He said I was going too fast. Does that please you? I saw the child, but to turn aside would have meant ditching the car and killing us both most likely. But he—he saw it too, a second later, and grabbed the wheel. Just as if that wasn't a foot thing to do! But he was too late. We went over her—somewhere. I don't know where. I didn't look at her. It wasn't necessary. He seemed to know what to do."

Angela paused, breathless, but her husband did not speak. His silence maddened her.

"She was only a little word anyway," she went on angrily. "The woman who boarded her was right there. She screamed at a doctor who happened along just then, and he said she'd die—that there wasn't a chance in a thousand. But nothing would suit Nick Hastings but to take her to the hospital—thirty miles out of our way, and it was beginning to rain. Don't look at me like that! Do you think I've been on a pleasure trip?"

She was shaking violently, while Halliday, still silent, stared at her in horror. Then pulling himself together, he said: "You must go up to bed. Go now, or you'll be ill. I—Mark? Was that a cry?"

He went to the window; threw it open; and Angela, in a sort of daze, heard him call: "All right. I'll come, and, with no backward glance, he left her, alone in the silent house."

It was James Halliday who got Nick to bed—who called the doctor—who went out into that damp, cold dawn in the car that had done such deadly work, and brought back a nurse. It was he who roused the faithful Julie from her morning slumber, and brought her into Gay's nursery, so that Gay herself could snatch some needed rest.

When at last he went home across the garden, the world was a thing of glory in the morning sunlight. He passed for a moment as he reached the door, as if to take some of its beauty into his starved heart; then, moving quietly he went to his wife's room, and stood there, looking down on her peaceful face with a sense of uneasiness.

She was sleeping the sleep of a tired child—she, who had, perhaps, taken a human life. She lay there warm and secure in her blanket, while in the house next door a man was beginning the grim fight with death—and miles away a little child.

Only one person was mentioned to death in Scotland had gone—and he was reprieved.

## Figures Are Appalling

Interest Alone On Britain's War Debt  
To Exceed \$100,000,000

Miss Helen C. Wilkinson, British Labor M.P., has been speaking to audiences in Montreal about the absurdity of the existing war debts. She has characterized the totals reached by these obligations as "positively astronomical figures" for the payment of which no one can ever find a formula. Agreeing with leading Americans who wish to see the debts reduced or cancelled, Miss Wilkinson quoted Winston Churchill as having said that, in 1904, the amount of tribute from Europe to America under the existing war debts would be equal to the yearly wages of 100,000,000 European laborers. The late Lord Balfour had commented concerning payments on war debt by Britain to America—the interest of which is a million per day—that when the first installment of the debt was paid Britain owed twenty millions more than before anything had been paid, and at the end of twenty years would owe two hundred and seventy-five millions more than was owed by Britain before the latter had paid a penny. An Miss Wilkinson has said, these debts are nightmarish in their proportions, and can never be settled.

Their existence today is the greatest obstacle to the world's return towards prosperity. What is more, they would have all been wiped out had the United States in 1922 accepted Great Britain's offer to cancel Europe's debt to her if the United States would cancel Britain's debt to the American Republic. Had that proposal been taken up the United Kingdom would have forgiven debts twice the size of that which she asked the United States to forget. But rampant politicians at Washington stood in the way, and the international situation has gone from bad to worse ever since.—Toronto Mail and Empire.

Just Right  
For Upset Stomach

For after-eating distress, gas, nervous and bloating, the quick and positive standard action of Glaxo's Magnesia has proved to be just right. Relief, certain and gratifying, almost instantly follows the very first dose—and a few cents worth obtainable from any good druggist, lasts for a long time.

## Little Help For This Week

"He faitheth not."—Ezekiel 18: 5.

He who hath led will lead  
All through the wilderness;  
He who hath fed will feed;  
He who hath blessed will bless;  
He who hath heard thy cry  
Will never close his ear;  
He who hath marked thy faintest  
sigh

Will not forget thy tear.  
He loveth always, faitheth never,  
No rest on him today, forever.  
—Frances Ridley Havergal.

Hadst thou ever found that God hath dealt unfaithfully with thee? or didst thou ever hear that He hath dealt unfaithfully with any other? There is no want of power in Him that He should not be as big as His word; there is no want of love in Him that He should not be as good as His word. We are fleeting and mutable, off and on; today not the same as yesterday; and tomorrow, perhaps, like neither of the days; yet He continueth yesterday, today, and the same to-morrow.

—Bishop Doane.

## Faced the Test

Fourth Minister Faced Death To Be a Good Father

The sporting Scotch quip was common to discover if the new parish minister was a good fellow. He asked him to dinner. When they commenced the meal the host said: "Tonight I offer you a glass of champagne, Mr. MacTavish?" And the minister replied in a solemn voice: "There's no occasion for champagne." "Oh," said the quip, "Well, perhaps you would take a glass of Chateau Yquem." "There's no occasion for Chateau Yquem," returned the parson in a solemn voice. "Well," said the quip, determined at a final effort, "would you take a whiskey and soda then?" "There's no occasion for the soda," said the parson. And all was well.

First Remedy To Reach Railway Depot In Mesopotamia

A railway station, believed to be the world's oldest in point of the date of manufacture of the material from which it is made, has just been completed at Tellillah, Mesopotamia, for the use of the expedition of the University of Pennsylvania Museum and the American School of Oriental Research at Bagdad.

Built on the Khorsabad Railway, almost entirely of brick made more than 3,000 years ago, in the reign of King Ashurnasirpal, the station will be used as a shipping-point and storage house for objects found in the excavations at Tellillah.

Angel Glacier  
Angel glacier on Mount Keith, Canada, Jasper National Park, is so named because the glacier appears to be in the form of a huge, white angel with outstretched wings.

WHEN CHILDREN  
FRET

THERE are times when a child is too fussy or fretful to be able to sleep. There are many times a mother cannot get away. But there's a quick remedy in Castoria.

For colic, and other infantile ills, give this pure vegetable preparation. Whenever a child teases you with colic, or fretfulness, or when there's any sign of sluggishness, Castoria has a good taste; children love to take it. Buy the genuine—with that E. W. Fletcher's signature at the top.

**Fletcher's CASTORIA**

From Mother  
of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a little baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born, and have certainly received great benefit from it. I urge my friends to take it if I am sure they will receive the same help I did."  
—Mrs. Mabel McMillan, Vancouver, Canada.

**Lydia E. Pinkham's Vegetable Compound**

Stony's senior hockey team has a number of tied games on their hands this present season, and as their admirers are wondering what can be done about it, the following from the sporting columns of Vermillion Standard showing how its done in other towns may help:

As the C. N. R. and the Elm household teams have been unable to arrive at a decision after two encounters, it has been suggested that a delegation be appointed to interview the mayor, requesting him to send a delegation from town council to wait upon the Provincial government asking them to arrange for a delegation of M. L. A.'s to visit Ottawa with the object of urging the Dominion Gov't to appoint a board of arbitration to settle the dispute.

On Sunday local farmers again showed their superiority over their much heavier rivals from Norway by whitewashing them 2-0. Eddie Mayer played well between the pipes.

If the ice holds out, the manager intends lining up his team against Calson, Wabunan, Evensburg in the next week.

Despite the fact that the visiting One-way Girls team was bolstered by two star players from Edmonton, our team emerged victorious by the score 2-1. This was the second game of a double-header played here Friday. Elwyn Brown, A Miller, I Fehr,

The South Side Wolverines have challenged the fair sex for a game of hockey next week.

United Church service every  
Sunday Evg. at 1:30

W. Boman, Miss B. Wedel and Miss M. Radtke spent the week end in Oshkosh, attending a Wal-  
ter League Conference.

The English service on Sunday was attended by about 80 persons. The sermon was delivered by Rev. Moring of Duluth.

The losing side of the Christmas Stock Campaign sponsored a Vol online party on Friday night.

Watch for the Walker League play, at Honey Plains, Friday, 10th April.

When he launched the 42,800-ton Canadian Pacific liner *Empress of Britain*, H. R. H., the Prince of Wales, referring to the Knickerbocker Bar—as the cocktail bar of that magnificent new ship is to be known—said that its frequenters “can let their imagination run riot in a rosy haze amid the fantastic humour of Mr. Booth Robinson.”

The Prince referred to the announcement that Britain's foremost home-grown artist has been given a free hand to decorate that room on the new liner which is to make its bow to Canada June 22nd next.

Developing a humorous legend of the cocktail of his own invention, W. Heath Robinson, who is shown above at work on some of the jigs, also has prepared a decorative scheme that extolls the virtues of the cocktail and depicts ingenious machinery employed in its manufacture.

North Robinson's ideas of the latent labour-saving machinery in connection with the selection and preparation of cherries for cocktail embellishment are shown together with the Foolproof Safety Aeroplane, a direct descendant of the mythical cocktail bird. This ceiling decoration depicts the uplifting powers of an appetizer. These, and other drawings will appear on the walls and ceiling of the room.

The price is history. Release  
 date: January 1999. Price: \$19.95.  
 ISBN: 0-07-059389-7.
